FUN CUP CHAMPIONSHIP 2017

Prepared by FJA TV / CHRIS HARTLEY MEDIA
14th November 2017

OVERVIEW

Our 16th year of coverage of the Funcup Championship but importantly, the first year of coverage under a new business relationship comprising Frank Johns Associates and Chris Hartley Media. Whilst we moved towards this relationship during 2016 it was not until this year that both parties took on the total financial responsibility and management of all filming and post-production for the series, giving us full control of all aspects of production providing for greater flexibility, creative control and cost efficiency. The complete independence that this has afforded us has, we believe, been reflected in both the very high quality of programmes produced and our ability to negotiate directly with alternative or additional broadcast media whilst retaining our long terms links with channels like Skysports and Motorsport TV.

The new 'presentation team' line-up of Chris Hartley and Kiri Bloore has been hugely successful and without doubt they have provided a combination of knowledgeable and well-informed comment with that always welcomed hint of humour. This is more than borne out by the positive comments received from all competing teams plus viewers alike.

For 2017 our proposal saw the introduction of a revised schedule of coverage of each round of the championship. The introduction of one-hour programmes to cover the championship's first round at Silverstone and the final round at Oulton Park, where our audience enjoyed a nail-biting climax to a season of excellent racing, was supported with half-hour coverage of the rounds held at Oulton Park, Brands Hatch, Snetterton and Anglesey. Our traditional mid-season visit to the 25-hour Spa was also included within our overall proposals. The inclusion of the new one-hour programme greatly enhanced coverage of the championship with the Silverstone round providing an in-depth introduction to the new season, the teams competing plus a full report on the race itself. For the final round at Oulton Park our one-hour programme allowed us to summarise the championship so far and focus upon the three teams that could win the championship outright. With only 12 points separating the top three this was to be the closest championship decider in the history of the Funcup. The racing was epic, and the fight went right down to the wire!

Without doubt the televised coverage that we have managed to achieve throughout the year to date has exceeded our original projections, also our interim report produced in July and, to be frank, our wildest expectations. The interim report produced in July forecast the possibility of an over delivery in terms of the number of hours broadcast of some 100%. We fell short by 2%! Importantly the results achieved in terms of the quality of airtime slots has been impressive with huge gains over the previous years in both Prime and Secondary slot broadcasts.

Importantly the overall audience viewing has held up well throughout the season. Our interim report produced in July included for the first time, data compiled from the industry's most trusted source, BARB (British Audience Research Board). In the interests of consistency, we complete our report by including data recorded from mid-July to November 5th, 2017.

Motor Trend on Demand:

We do not have any audience data for this new channel but as reported in the following summary we have established that since launch earlier this year they have already signed up over 100,000 subscribers.

Summary comments

Overall viewing audiences have held up well throughout the year and Skysports reshaping of its sports channels, which now see our programmes being aired on Skysports Action and Skysports Arena, is delivering us a larger audience and both channels have shown consistent good growth throughout this year. Motorsport TV's growth, or should we say performance has remained relatively flat in the UK but of course this channel also enjoys huge coverage throughout Europe. Frontrunner, the new boy on the block, has rewarded us with good consistent growth since its launch with average weekly reach figures starting from around 16,000 viewers to some 66,000 by late October. Whilst small when compared with our other broadcasters its providing us another audience and important frequency of coverage.

All in all, we hope that you will agree that it has been a brilliant year in terms of televised coverage and programme quality. If we may repeat a comment that has often been made by folks both directly connected to the Funcup Championship and from those who just watch on TV, "next to F1 and the BTCC the Funcup coverage is brilliant".

Our thanks to the championship organisers, teams and clubs for all their co-operation throughout 2017.
